

Engraving & Laser Marking

Inscribe Australia is dedicated to the manufacture of specialised engineered engraving & marking solutions to the manufacturing sector.

With a collective industry experience spanning decades, we offer clients and engineers comprehensive solutions for all their engraving & marking needs.

We work with some of Australia's biggest manufacturing & engineering companies, ensuring their products are permanently branded to the highest level of quality and care.

Inscribe Australia offers each client a customised solution to meet their specific requirement needs. We select "best-fit" solutions and perform high-quality engraving & marking processes that delivers clarity, speed and choice of services.

For more than 30 years, Inscribe Australia has been delivering quality engraving & marking solutions to a wide range of valued clients across a myriad of industries.

Our reputation for exceptional design, our ability to adopt the very latest technology, and our consistently superior workmanship give clients confidence.

INSCRIBE ENGINEERING

Inscribe has manufactured & delivered solutions to commercial & industrial clients including:

- Mining Industry
- Machine Manufactures
- Audio Visual & Security Companies
- Engineering Companies
- Tool Makers
- Automotive & Marine Industries
- Governments & Council Departments

Why Choose Inscribe for Engraving & Laser Marking?

Inscribe Australia offers competitive pricing on all Engraving & Laser Marking services. We want your work! We offer a total solution & service from concept layout and design through to manufacture. With our online order tracking to help keep you informed.

Security & Peace of Mind Guarantee

To ensure your parts are safe & secure while at our premises we have CCTV & motion alarms through out and factory is monitored 24 hours a day.

Expertise, diversity and flexibility:

From smallest, right up to the largest engraving or marking project imaginable. Inscribe Australia has the capabilities to fulfil your needs. We have more than 30 years experience and our workshops house the latest state of the art machines available. We're the easiest to deal with for all your engraving & marking needs.

Insurance & Guarantee

We take pride in manufacturing a great product. All our products come with a satisfaction guarantee. You can be sure all our workmanship is made to Australian & New Zealand standards.

Engraving & Laser Marking

Laser Marking & CNC Engraving

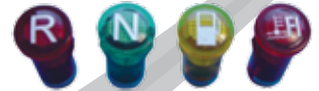

Laser Marking is our latest engineering technique. Laser Marking offers the benefit of a non-contact, permanent mark onto almost any type of material. High precision laser marking up to 1200DPI is ideal for a wide range of applications and industries. Recommended indoor use.

CNC Engraving is the traditional method by router removing a few microns to hold paint or colour inks. The result is permanently marked. Recommended indoor/outdoor use.

Special Services

Our Services Include:

- Logo etching, certification symbols, serial codes photographic images
- Engraving & marking of barcodes and 2-D data matrix code.
- Marking and cutting of foils and light gauge MDF and plastic.
- Marking medical and dental instruments without surface abrasion
- Rapid marking on previous metals with heat sensitive materials
- Engraving Trophies, plaques and we specialise in electrical Labeling.
- Plastic materials: day and night design for items such as mobile phone keyboards, dashboards, and other illumination components for aerospace and automotive markets. And much more....

Automotive Engineering

ABOUT INSCRIBE AUSTRALIA

Inscribe Australia has 30 years experience in the signage and engraving industry managed & directed by Devon Jackson and Chris Calleja, Supported by an experienced in house graphic design and digital printing studio with an expert technical engraving engineers and craftsman.

We have a reputation for skilled, quality work, carried out to the highest standards of excellence.

Materials we can mark & cut.

We can mark just about any thing.

*FREE Samples on any materials or objects you would like marked are welcomed. *Conditions apply

Most Plastics Mark & Cut

We mainly mark ABS products in 2 ply. The top coat is engraved away to leave lettering the colour of the base layer. Available in matte & glossy finishes in a wide range of colours, suitable for indoor and outdoor uses. Ideal for labels and signs. We can mark & cut acrylics & some PVC's

Anodised Aluminum Mark & Cut

Aluminum sheets are anodised in a range of colours. When CNC engraved or laser marked the result will leave a silver or black mark. Ideal for labels, tags, compliance plates & general engineering of parts.

Coloured Steel & Brass Mark & Cut

Steel plates or coated brass are ink or paint treated. CNC or Laser Marking is achievable in this range. Ideal for trophies, plaques and cutouts.

Stainless Steel Mark Only

Stainless Steel 304/316 grades can be CNC or Laser marked and are both very durable. We can also laser cut some parts depending on gauge.

Laser marking up to 1200DPI is also possible into stainless MONO Black Photo Quality.
